1. Table Creation

```
CREATE TABLE student (
   student_id INT PRIMARY KEY,
   name VARCHAR(50),
   department VARCHAR(50),
   gender VARCHAR(10),
   marks INT,
   semester INT
);
```

Insert the data shown below

Student Table

Student ID	Name	Department	Gender	Marks	Semester
1	Anita	CSE	Female	85	1
2	Rahul	ECE	Male	78	1
3	Sneha	CSE	Female	92	2
4	Arjun	IT	Male	69	1
5	Kavita	CSE	Female	81	2
6	Suresh	ECE	Male	75	1
7	Divya	IT	Female	88	2
8	Karan	CSE	Male	90	3
9	Meera	ECE	Female	73	3
10	Rohit	IT	Male	60	2
11	Priya	CSE	Female	95	3
12	Nitin	ECE	Male	84	3

Queries

1. Total students in each department
2. Average marks in each department
3. Departments having average marks above 80
4. Number of male and female students in each department
5. Maximum marks scored in each department
6. Minimum marks in each semester

7. Average marks of male students in each department
8. Total marks of students in each semester
9. Count of students in each semester where total marks > 200
10. Departments with more than 3 students
11. Average marks by gender
12. Gender-wise average marks for each department
13. Departments where female students scored average above 85
14. Semesters with average marks less than 75
15. Count of students grouped by semester and department
16. Department and semester-wise average marks
17. Departments where max marks > 90
18. Semesters where min marks > 70
19. Total marks per department for 3rd semester students
20. Department-wise average marks of students whose marks > 80
